Retrieving Data From A Database: retrieving.php

```php
<?php

    $link = mysqli_connect("localhost", "cl20-exampledb", "K7.7grb-Y", "cl20-exampledb");

    if (mysqli_connect_error()) {

        die("Could not connect to database");

    }

    // $query = "INSERT INTO `users` (`name`, `email`, `password`) VALUES('Beth', 'beth@gmail.com', 'apples')";

    $query="UPDATE `users` SET `name`='Bethany' WHERE `id`=5 LIMIT 1";

    mysqli_query($link, $query);
```

?>
